The Lord's Supper will also be administered at—
Leland, 3 p.m.
Social Plains, 7:30 p.m.
We invite you to come and worship with us.
Rev. Geo. A. Shields, Minister.

Beef Industry

According to Senator Riley the production of Beef in Canada has followed the market during recent years.
From 1914 to 1922 our cattle went into U.S.A. markets free of duty, and these were banner years of production and prosperity for this industry.
In 1922 the Fordney-McCumber Tariff came into effect, and we were thus forced to ship to Great Britain. This continued to hurt our market till we were driven out by South America. The people of that continent put chilled and frozen meat on the old country markets at prices so attractive that we were again forced to sell in U.S.A. markets and pay the 12-26, per lb. duty.
Then last year the American duty was further increased so that the Chicago market was closed.
In 1931 representatives of large co-operatives in Great Britain visited Canada and were so pleased with the character of the cattle that they made arrangements to make a weekly shipment. At present Canada consumes 90 p.c. of the beef raised at home, but the exportable surplus sets the price.
A real effort is being made to produce as much beef as was sold before the United States raised her tariff barriers. If this could be done forty million dollars (40,000,000) of new money would come into Canada.

The live stock industry is then very important but the spread between the price paid the producer and the price the consumer pays, shows the need of organization. The development of this industry would provide more work during the winter and would provide a market for the over-cow grains which are now selling at such a deplorably low price. It would also help the railways and bring a measure of prosperity generally.
To realize this a constant supply must be provided for the market. Here surely is a great field for activity. Already the Live Stock Associations have set up an agency under Mr. Arkell, to solve these problems. The Minister of Agriculture is giving valuable assistance and it is hoped that the success that the early shipments have attained will be continued.
Sincerely, F. W. Gershaw.

Mr. and Mrs. W. Acton, returned on Tuesday night from their holidays. Mrs. Clark the father's mother, arrived with them and is visiting here.

J. Northcott has had the front of his residence painted.

Bridge Timbers Fall and Badly Damage Car

On Monday night when crossing the Red Deer River bridge in their car, Mr. and Mrs. C. Johnston and baby daughter, had a narrow escape from serious injury. Heavy overhead bridge timbers which had become loosened, fell and badly wrecked the front part of the car. It was a fortunate escape for the occupants.
Const. Cameron notified authorities. Road Foreman Gardner, with two assistants arrived here early Wednesday morning to inspect the bridge. Mr. L. Bowler is doing necessary repairs.

money would come into Canada.

The live stock industry is then very important but the spread between the price paid the producer and the price the consumer pays, shows the need of organization. The development of this industry would provide more work during the winter and would provide a market for the over-cow grains which are now selling at such a deplorably low price. It would also help the railways and bring a measure of prosperity generally.

Tree-Planting Car Attracts Large Crowd At Empress

The Tree-Planting Car of the Canadian Forestry Association was in town Saturday, and the lecture and moving pictures which commenced at 8 o'clock in the evening attracted a large crowd of both residents of the town as well as many farming people from the surrounding district. So large was the crowd that after all seats as well as the aisle had become full, later arrivals viewed the programme by standing outside looking in the windows. The pictures comprised a most comprehensive three reel feature on Tree Planting, covering how to plant, prune and arrangement of planting, as well as the best varieties to use, how to lay out the home and the results from a standpoint of beauty and profit. It provided fine educational value and splendid attention was given the showing. The entertainment side of the evening was well rounded out, some beautiful pictures of the scenic beauty of Canada being flashed on the screen. A reel depicting deer, moose, beaver, bear and many of our other wild life, as well as an excellent fishing picture, were enthusiastically received, and interesting reels covered various winter sports for which Canada is famous, as well as a reel on the making of Maple Syrup, both old and new methods. Two comedies completed this part of the programme, which were highly amusing, and long enjoyed by the younger people present.

In the lecture, the speaker stressed the increasing need of trees for protection to ourselves, our buildings, stock, gardens, and even to our crops. He pointed out the permanency and beauty they give the home, resulting in added comfort and pleasure in our living conditions, thus making us much more contented in our home surroundings. In speaking to the townspeople present, he urged them to beautify their town. Some civic planting should be undertaken, this would result in added interest in the work with the result that the residents would beautify their homes. Empress can make a beauty spot by the use of trees and shrubs, not only will this give its residents pleasure in comfort and beauty but will do much to attract visitors, as well as future citizens, resulting in added town business. The better varieties should be used in ever plantings, such as ash and elm, for home planting, evergreens should be used as much as possible, because they give beauty and protection all year round. White spruce, he stated, was a very hardy tree, once started, and would do well any where in town.

After the meeting a number remained for a short period to secure further information on various phases of the work. Empress has wonderful natural advantages. A short distance away is a splendid camp and picnic ground with fine swimming in the Saskatchewan river. The possibilities of development here are of the best. With rivers at no great distance on both sides of town, offering an unlimited water supply, makes any determined effort at town beautification an assured success—Alan Bennett.

Arrange for Feed

It has been suggested to us that in view of shortage of pasture and feed, that farmers should now endeavor to make arrangements for their requirements. At the present time there are large quantities of hay available. Securing necessary permission, etc., an outfit of ten head of horses, necessary implements and three or four men, might find such a venture extremely profitable.

Cream Market Report

For the week ending July 18th, 1931, the following prices were paid by creameries per pound of butterfat, in the several grades of cream, and at the points shown:
Jasper Dairy, Edmonton, Special grade, 19c-20c; No. 1, 17c-18c.
Calgary Creameries, special grade, 17c, No. 1, 15c, No. 2, 12c.
Minimum: Special grade, 16c-17c; No. 1, 14c, No. 2, 11c, off grade 6c.

Castle Coombe

United Church services will be held Aug. 2 at 8 p.m.
Mayfield at 11 a.m.
Sunday School will follow church service.
Worship at 3 p.m.
D. B. Tupper, Student-in-charge.

Do Not Require Stamp

Small cheques of \$5 and under do not require the 2c tax stamp.

With rivers at no great distance on both sides of town, offering an unlimited water supply, makes any determined effort at town beautification an assured success—Alan Bennett.

R.M. Mantario No. 262

Minutes of meeting, Monday, July 6, 1931, at Orange Hall, Cuthbert, 10 a.m. Present, Reeve Walker and a full council.

The Council sat as a Court of Revision and the following appeals were heard:

No. 1 Hudson's Bay Co., blanket appeal against assessment of all lands owned by them in the Municipality. Disallowed. S.W. 3-24-28 w3, reduced to \$8 per acre.
No. 2, Royal Trust Co., Campbell Estate, Disallowed. All 7-23-28 w3.
No. 3, Chester Moffat, W3 19-20-28 w3, Disallowed.
No. 4, D. McCallum, E3 16-24-27 w3, Disallowed.
No. 5, Holland Canada Mfg. Co., A further appeal on all lands disallowed last year. S.E. 7-25-28 w3, was reduced to \$1000. In regard to the appeal was disallowed.
No. 6, D. Fitzpatrick, E3 2-26-27 w3, Disallowed.
No. 7, E. G. Tabbett—Blanket appeal on all lands owned in the Municipality. Disallowed. A reduction was authorized in respect of the following which on inspection appeared to be ineligible with the assessment of other lands of equal value.
S3 25-26-28 w3, reduced to \$6 an acre, S.W. 16-26-28 w3, reduced to \$10 an acre; S.W. 3-26-29 w3, reduced to \$10 an acre; S.W. 13-26-29 w3, reduced to \$2400; N.E. 13-26-29 w3, reduced to \$2400; S.W. 13-26-29 w3, reduced to \$2400.
No. 8, B. Shaw, all 3-27-29 w3, disallowed.
No. 9, A. W. Ashley, N.E. 25-28-28 w3, reduced to \$1000.
No. 10, Burns & Co., S4 27-28-28 w3; S.E. reduced to \$210, S.W. to \$180.
No. 11, H. G. Taylor, E3 33-27-28 w3, disallowed.
No. 12, E. E. Tracey, N3 30-27-28 w3, disallowed.
No. 13, Alex. Mitchell, S.W. 21-25-29 w3, disallowed.
No. 16, C. Mitchell Estate, S.W. 25-29 w3, reduced by \$250.
No. 17, W. D. Rivers, S4 24-29 w3, S.W. reduced to \$300; S.E. to \$2670.
No. 18, J. C. Hughes, W3 14-24-29 w3, disallowed; N.E. 14-24-29 w3, reduced to \$2300.
No. 19, Mrs. Margaret Hughes, W3 S.E. 13-24-29 w3, disallowed.

Burstall Win First Money At Empress

Successful Ball Tournament Is Staged

The Empress Ball Tournament was held on Wednesday, July 22. The day was very hot, which undoubtedly had its effect on the attendance, which was very fair, considering. Teams present were: Mundham, Leland, Acadia Valley, Burstall, Empress and Leland. Good brand of ball was witnessed, Burstall defeating Empress for final money. Acadia Valley defeated Empress in the final of the ladies softball. Prelate defeated Empress in the final of the men's softball. Junior running races were also staged. A good dance at night concluded a successful day's activities.

No. 20, J. Hamilton, N3 21-25-29 w3, disallowed.
No. 21, A. Ashton, S.W. 30-25-28 w3, reduced to \$1870.
No. 22, Theo. Lam, N.E. 31-27-27 w3, reduced to \$1200.
No. 23, A. Parenteau, S.E. 10-24-29 w3, \$2300.
No. 24, Mrs. L. Nummemaker, N.W. 30, S.W. 31-27-28 w3, disallowed.
Clerk of the Court of Revision.

The regular meeting was opened at 1 p.m.

Minutes of previous meeting read and confirmed motion of C. H. Hawley.

Monthly statement ordered Read, G. Edwards.

Finance committee examined accounts presented. The following were found in order—

Day sheets, Govt. Grant work, \$1750.50.

Do Ronds, Div. 1, \$174.00; Div. 2, \$220.50; Div. 3, \$174.00 (including rolling material) \$27.55; Div. 4, \$27.50; Div. 5, \$240.00 (including culvert material); Div. 6, \$235.35.

Orders issued to merchants were ordered to be paid and deducted from the amounts due (out on back page)

Grave Political Situation May Result From German Economic Crisis

London, England.—Vitality critical days in world history are believed in Britain to be immediately ahead.

It was felt particularly in financial circles that, even the next 24 or 48 hours might produce developments which would finally decide whether a large section of Europe would plunge into economic chaos with all the attendant political upheavals or whether President Hoover's gesture really would bear its expected fruit.

Although outwardly the British week-end calm brooded over the country, the realization of great events stirring was present in many quarters.

Financiers, commercial directors and many others abandoned their usual Sunday game of golf to keep in touch by telephone with representatives in Paris and Berlin and it is safe to say that the day of rest of a number of government officials was in no sense only.

Secrecy with which Montague Norman and other leaders of international finance were conducting their operations had a national consequence in rumors and stories of all kinds in the press. One important Sunday newspaper devoted its largest headline to a report that the Federal Reserve Bank had expressed willingness to grant the Reichsbank credit of \$200,000,000 to \$300,000,000.

Other Sunday papers concentrated more on the political aspects of the situation with special reference to the precarious situation of the Brüning government.

Outside of news columns, editorial writers and others attempted to give their readers some clue through the use of past events. Although the great divergence of views naturally were expressed in their columns, there was practical unanimity in declaring the position grave in the extreme and that gravely largely due to delay in Paris while the French and United States representatives were discussing the Hoover proposal.

Zepplin Safety Postponed

Friedrichshafen, Germany.—Dr. Hugo Eckener, president at a meeting of stockholders in the German Aeronautics Society, said his plans for regular trans-Atlantic Zeppelin service had been postponed until next year because of the unfavorable economic situation.

Political Leaders Clash On Old Battleground Of Tariff Principles

Ottawa, Ont.—The amendment of Mr. Hon. Mackenzie King moved on third reading of the bill to create a tariff board, was defeated in the House of Commons 24 yeas to 85 nays.

The vote stood: For the amendment, 24; against, 85.

As soon as the result of the vote was declared, Hon. Ernest Lapointe, former minister of justice, moved the six months' limit to the bill. This motion was declared lost without a registered vote.

The bill then received third reading.

Ottawa, Ont.—Liberal and Conservative leaders clashed once more on the old battleground of tariff principle. Asserting that the existing policy of the government, as exemplified in changes of duty provided for in the budget, would bring about a policy of stagnation in Canada's trade, Mr. Hon. Mackenzie King, opposition leader, criticized the government proposals.

This was not a time for experiments warned the Liberal leader. The trend of the world's trade, he pointed out, was in the direction of lower tariffs; high tariffs had been tried and found wanting, and nations were turning back to moderate duties.

Canada was confronted with an extremely grave situation, retorted Hon. R. B. Bennett, Prime Minister. Depressed conditions throughout the world were forcing nations to adopt extreme measures. Depressed goods into an unprotected Canadian market might mean the extinction of industries of Canada engaged in the manufacture of those commodities. This the government proposed to prevent.

The House of Commons was engaged in consideration of the most contentious piece of legislation remaining on the order paper when

North Battleford Storm

Hurricane Does Damage Estimated At \$100,000

North Battleford.—Damage estimated at \$100,000 was incurred here Friday, July 10, as, for three-quarters of an hour, the city rocked in a storm of cyclonic proportions. No lives were lost as the maelstrom swept through the city, but all movable property in the path of the storm was ruthlessly surged aside. The storm commenced at 5 o'clock and lasted until 5:45 p.m.

Roofs were torn off buildings like so much matchwood. Buildings were turned upside down and cars were swept with the storm to the limits of the city.

Greatest individual damage was done to the provincial power plant, the roof of which was torn off and the main steam heater severed in two parts as falling masonry from caving walls descended about the turbine in the engine room.

King Street was completely blocked by fallen roofs and the Gregory building was denuded as a tremendous gust of wind took its toll. Other buildings to suffer included the Olding Block, Massey-Harris Building, and the Riverview school, which was erected last year.

Medals For Bravery

Four Young Brazilians Receive Recognition From Royal Canadian Mounted Police

Hamilton, Ont.—Bronze medals "for bravery" have been awarded to four young men of Rio De Janeiro, Brazil, by the Royal Canadian Mounted Police.

The four, cited for their heroism March 27, 1932, were: Norberto, a North American visitor from drowning at Copacabana Beach, are Archibaldo Pinto Amado, Jorge Pinto Amado, Edilberto, and Roberto Delabella.

The rescue occurred at the beach when three members of the Canadian trade mission to Brazil, and a friend from the United States, went swimming there. They were carried out from shore by the heavy surf and the undertow, when the young Brazilians went to their assistance.

One of the men rescued, C. E. Marley, London, Ont., failed to respond to attempts at resuscitation. But the three others, Arthur W. White, London; Thomas H. Ramsey, Edmonton; and W. F. Routh, United States friend of the party, survived.

Sympathy From Britain

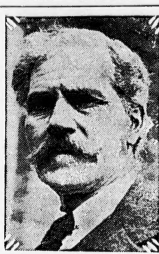

Expression Of Regret On Partial Crop Failure Hurd In British House Of Commons

London, England.—"I am sure the House will greatly regret to hear the present drought is expected to have a very serious effect on crop prospects in the prairie provinces of Canada," said Mr. Hon. J. H. Thomas, secretary for the Dominions, referring to the House of Commons to the causes and probable economic effects of the failure of a large portion of the Canadian wheat crop. "As to the position generally I can only refer to the statement made by the Prime Minister of Canada on July 3." The House continued. This was Mr. Bennett's review in the House of Commons of the situation of the prairie provinces of Canada, confronting the people of a large section of Alberta and Manitoba, when he announced the Dominion government would take measures for relief.

DADDY DOES THE TRICK

In all the millions that followed the progress of Wiley Post and Harold Gatty, who flew around the world in nine days, none were more intimately interested than the group presented above. Mrs. Harold Gatty, wife of the flier, with her children, Alan, five years old; Lindsay, three, and Ronald, who is nearly two. They were confident "Daddy" would get back home in "Winnie Mae" after the strenuous flight.

PREMIER MACDONALD

War Debts Moratorium

Labor Government sustained when re-elected leftwingers who moved rejection of unemployment insurance anomalies bill, were defeated by vote of 231 to 19.

Looking For Advance In Disarmament Plans

Move Is Seen As Consequence Of War Debts Moratorium

Washington.—Definite advance in world disarmament is expected by the administration as an important consequence of the war debts moratorium.

With the holiday in intergovernmental payments definitely assured and now more exactly what the remaining details President Hoover and his advisors made the forthcoming general disarmament conference their next diplomatic objective. Three times in as many months the chief executive has linked the increasing costs of armies, navies and fortifications directly with the world's economic burdens.

The disarmament conference will be held at Geneva in February, 1932, under the auspices of the League of Nations. The United States will participate fully and officially.

Had Easy Victory

Labor Government Triumphs Over Re-elected Leftwingers

London, England.—The government had an easy triumph in the House of Commons over re-elected leftwingers who moved rejection of the unemployment insurance anomalies bill, which aims to remove some of the unsatisfactory features existing in unemployment insurance.

The left wing, led by James Macdonald, objected that the bill was wholly inadequate, but after some hours debate they failed to convince the House and the rejection motion was defeated 231 to 19.

The minority included the followers of Sir Oswald Mosley, who moved from the Labor side of the House to the opposition side. The Conservatives did not vote and several Liberals and Liberals also abstained.

Anglo-American Relations

Toronto, Ont.—Delegations of university professors and students from Great Britain and Canada have accepted the invitation of the Carnegie Foundation to discuss Anglo-American relations with a similar group from United States colleges at the University of Michigan from July 12 to 16. Stanley Hands will represent the University of Alberta and James A. Gibson, University of British Columbia.

Prairie Premiers Will Hold Conference To Discuss Pool Affairs

Approve Tariff Board

Term Of Office Is Fixed For A Period Of Ten Years

Ottawa, Ont.—After a rough passage and much huffing, the government bill providing for the appointment of a tariff board finally passed the committee stage in the House of Commons. It now stands for third reading which, in the majority of cases, is merely a formality. It is possible that members of the Liberal opposition will seize the opportunity offered by the motion for third reading to voice briefly once again the many objections which they have registered. Discussion, however, must now be limited.

The bill, in brief, provides for the appointment of a board of three members, of which one is to be chairman, with the powers of a court of record. Its functions are indicated by the prime minister, will be to "find facts" upon which tariff duties may be based. It will endeavor to determine the present production of goods in foreign countries, the cost of producing similar goods in Canada, and the relative duties necessary to equalize costs.

Its findings shall be reported to the Finance Minister. Salaries are placed at \$12,000 for the chairman and \$10,000 for each member of the board, and the term of office is fixed at ten years.

In addition to its purely tariff activities, the board is empowered to perform certain functions under the Combines Investigation Act. It also assumes the duties now attaching to the board of customs.

It is Premier Brownie's intention to attend the meeting of the wheat pool delegates in Calgary and then to go on to Regina for the inter-provincial meeting. The general lines of a suggested plan of re-organization will be discussed at the meeting.

Calgary, including elevator policy and general operation, and its decision will enable the Regina conference to go on to Regina for the inter-provincial meeting. The general lines of a suggested plan of re-organization will be discussed at the meeting.

As to the government guarantee, Mr. Brownie says that it is felt by the three premiers that uniform steps to safeguard them are desirable, and that the discussion of the question will be discussed following up and finally acting upon the preliminary discussions already held.

Invitation Extended To Prairie Premiers

To Give Evidence Before Committee On Grain Marketing

Ottawa, Ont.—The House of Commons committee on agriculture is expected to invite the three premiers of the three prairie provinces to have one of them appear before the committee to give evidence respecting the marketing of grain.

The suggestion was placed before the committee by Milton N. Campbell (Prog. MacKenzie), who urged that since the prairie provinces had been left "with the elevators on their doorstep" by the governments of the provinces were vitally concerned in the conditions of grain marketing and in carrying out the responsibilities which they had now fallen heir to.

The sentiment of the committee was that the provincial prime ministers might select one of their number as spokesman. "We have not disposed of grain marketing," said R. C. "but the policy (A. Row River), until we have heard from them."

Mr. Cairns predicted a national catastrophe if there should be any flooding of the market this year with wheat. The presence of a 200,000,000-bushel carry-over on the North American continent this year was a factor which continued to threaten the situation, Mr. Richardson declared, and to this would be added a surplus expected for the present year among the wheat-growing countries of another 200,000,000. In spite of this, however, Mr. Richardson was optimistic for the future.

"Our main problems today are economic," Mr. Richardson said, "but the policy of this continent during the last few years has accentuated our difficulties. We cannot escape the penalty of having allowed an unbridled surplus to accumulate on the continent."

Mr. Richardson was opposed to the establishment of a wheat board,

Edmonton, Alberta.—Wheat pool re-organization and government guarantees of pool operations will be finally considered, it is expected, at a conference to be held at Regina this week, when the three prairie premiers will be present. The purpose of the meeting will be to decide upon a uniform method of dealing with both questions, to be adopted by the three provinces.

Premier Brownie has been in communication with both Premier Bracken of Manitoba, and Premier Anderson of Saskatchewan, the latter of whom is still in Ottawa and is representing the three provincial governments in the industry of the parliamentary committee on agriculture into the wheat marketing question.

After a general agreement between the premiers that an inter-provincial conference should be held as soon as possible to settle upon future organization and guarantee policies, but Premier Anderson will not be able to return for an earlier date than July 10.

It is Premier Brownie's intention to attend the meeting of the wheat pool delegates in Calgary and then to go on to Regina for the inter-provincial meeting. The general lines of a suggested plan of re-organization will be discussed at the meeting.

Calgary, including elevator policy and general operation, and its decision will enable the Regina conference to go on to Regina for the inter-provincial meeting. The general lines of a suggested plan of re-organization will be discussed at the meeting.

In spite of this, however, Mr. Richardson was optimistic for the future.

"Our main problems today are economic," Mr. Richardson said, "but the policy of this continent during the last few years has accentuated our difficulties. We cannot escape the penalty of having allowed an unbridled surplus to accumulate on the continent."

Mr. Cairns predicted a national catastrophe if there should be any flooding of the market this year with wheat. The presence of a 200,000,000-bushel carry-over on the North American continent this year was a factor which continued to threaten the situation, Mr. Richardson declared, and to this would be added a surplus expected for the present year among the wheat-growing countries of another 200,000,000. In spite of this, however, Mr. Richardson was optimistic for the future.

Capitalism An Admirable System

Capitalism Not to Blame for Depression Says Sir Thomas White

The statement that "capitalism is on its deathbed" is a favorite with Socialists, Communists and other kinds of radicals. It has been repeated so often without contradiction that people who are not well-informed on financial and economic subjects may have come to believe that it has some foundation. Sir Thomas White therefore did a public service by declaring at the meeting of the International Association of Comptrollers and Accounting Officers that society as constituted in Canada and the United States offers the best possible way of human life if administered with sanity and judgment.

Sir Thomas admitted that capitalism is on trial because so many people are questioning its advantages. Nevertheless, he said, the fault is not in the capitalistic, the individual system. It is an admirable system. The fault is in ourselves. He went on to show that if people were extravagant, if credit became inflated, this minute system would exact its penalty. The good, old-fashioned principles of thrift and economy would gradually correct the present depression as they have earlier depressions. "Don't blame the system," he said. "Blame yourself."

Ready To Plunge Again

Many People Waiting Opportunity To Play Stock Market

We suspect that a large section of the public is waiting to take another round out of the stock market.

Human nature will never be cured of the idea that it can get something for nothing, and if the opportunity looks good enough will leave all else and cling unto a chance that two and two will make five.

The stock market was strong before for thousands of Canadians two years ago, but readers will have noticed that when the market showed a gain of a few points following the war debt adjustment news, the halls of the brokers' offices commenced to fill one more with men who gazed wistfully at the changing figures on the board.

The stock markets advance 10 points and the rush to prove once more that two and two makes five will knock you down. —Regina (Evening) Leader-Post.

Grain Exports

Many Entries Received For Calgary Board of Trade Competition

Over a thousand application and entry forms were mailed to farmers in the Calgary district for the annual Board of Trade trading grain and good farms competitions this year, says J. H. Hanna, secretary of the Calgary Board of Trade. Last year about 50 farmers took part in the competitions and it is expected that a similar number will participate this year. The rules, regulations and prizes will be the same as in former years.

Up To The Dominion

Premier S. F. Timlake, commenting on the division of the Supreme Court of Canada in the radio reference repeated what the provincial government had already declared that it believed the matter to be one largely for Dominion jurisdiction.

The world's largest coin, a plate of copper 10 inches square, issued by Frederick of Hesse-Cassel in 1731, to represent the equivalent of £1, was found in London, England, recent for \$175.

The first women to use the new air service from Central Africa to Europe were Dr. Margaret Holliday and Mrs. H. R. H. St. John, who flew 5,000 miles from Kismu to London.

"You are on the stock exchange. Tell me something that is sure to rise." "The thermometer!" —Montague Charlow.

Hints For the Housewife

Might Be Useful When Things Go Wrong in the Kitchen

Too much salt often has spoiled the soup. A remedy for this is to add half a cup to a whole cup of sliced raw potatoes to the soup pan or soup. Let stand 10 or 15 minutes, remove potatoes and serve. The potatoes absorb the excess salt.

Delicately flavored vegetables such as asparagus and peas require very little salt, particularly when dressed with butter for serving. Use salt sparingly, for it's easy to add to taste individual needs.

If the mayonnaise separates, take another egg yolk in a fresh bowl and slowly beat in the curdled dressing, continuing as usual until you get the emulsion juice and oil used.

If a custard sauce curdles, beat it with a drier butter. The same butter often will beat the lumps out of a white sauce that has been made too big a hurry. If the sauce is very lumpy it can be rubbed through a fine sieve and reheated.

A tomato cream soup that shows an inclination to curdle can be converted into a thick tomato puree by adding butter and flour rubbed together in the proportion of 1 table-spoon of each to each cup of soup.

B.C. Plans Reforestation

Artificial Planting Resorted To For First Time In Province

Reforestation on a large scale is contemplated in B.C. The province has 8,000,000 acres in timber reserves, but, in addition, is now investigating areas along the coast especially suitable to the reproduction of Douglas fir. While natural reforestation must be depended upon for the re-stocking of most logged-over lands, next year, for the first time in the history of the province, artificial planting will be resorted to. Two of the areas likely to be selected are about Harrison Lake and Powell Lake. The first embraces an area of some 500,000 acres between Harrison and Alouette Lakes and the latter, which already contains some 300,000,000 feet of mature timber, and second growth, lies at the head of Powell Lake and embraces the upper watershed of Powell River and Lois River.

The extent to which re-stocking will be carried out is indicated by a statement that 800,000 seedling Douglas fir trees will be planted out in 1932 and the following year.

Has Saved Many Lives

Captain Sir Arthur Rostron, commander of the Cunard Line, who retired recently after 36 years' service with the Cunard Steamship Company and 46 years as a sailor, has saved more lives than any other commandeer. It was he who, as commander of the "Carpathia" in 1912, steamed at full speed for 60 miles to the aid of the sinking "Titanic" and rescued more than 700 passengers. He is 62 years of age.

The old steno-grapher, who was leaving, was posing the new one on the characteristics of the boss. "You'll be a Brown man of few words," he said.

"Gee! I'm a lunk!" thought the green steno-grapher. "I don't know very many!"

The first formulas for baking powder were developed in the United States in 1850.

Historic Landmark May Disappear

Adelphi Terrace May Disappear In Modernizing of London

Adelphi Terrace, long noted for its literary associations, and some of the adjacent property may disappear in the modernizing of London. The Adelphi estate is sold at auction this autumn.

This lovely and historic backwater of eighteenth century life will be missed by none more than American visitors, most of whom include it in their London pilgrimages. But inevitable progress has sounded the knell of the tiny street perched high above the Embankment Gardens, overlooking the Thames.

Sir James Barrie still lives in the corner house at Adelphi Terrace, but his erstwhile neighbor, George Bernard Shaw, has moved to Whitehall Court. David Greig lived in the ground floor of the terrace within a few hundred yards of the scene of his stage triumphs, and there he died in 1917. It was here that Raleigh lived and young Dickens wrote. It was here that the brother of Adam erected on the river front of Old Durham House the finest architectural block in London. At numbers 8 and 7 the Savage Club has had a home since 1880.

Beneath the terrace are the no less famous Adelphi arches, which also have had their share of fame, built by the Adam brothers in 1770, go, a new home will have to be found for the stocks of wine sold to be the largest in the world now reporting in their dark cellars. Six great wine merchants kept their stocks in these cellars, any one of which can hold 60,000 dozen bottles of fine vintage carefully laid away.

Many houses represent the purchases of noted connoisseurs of wine whose stocks are kept there during the years they are undergoing the process of maturing. The time is not so very long ago when the river flowed right up to the arches and barges unloaded their wine cargoes there.

Has Many Possibilities

English Language Can Be Used In Various Ways

The English language can be used in many ways. One can do so many things with it. At a dinner given to Prof. A. H. Young of Trinity College in Hart House, Toronto, Colonel H. C. Osborne in proposing the toast to the guest of honor, referred to him as a lecturer for punctuality. On one occasion, said Colonel Osborne, a student, after frequent admonitions for tardiness, was the first to appear for a lecture. He was commended by Professor Young in these words: "I see you are early of late. You used to be behind before. But now you are first at last."

Not So Good There is a man in our town, and he was wondrous wise. He swore by all the gods above he would not advertise. But one day he did break this rule; and hereby hangs a tale: The ad was for a small type, and headed "Sheriff's Sale."

Too balloons are used by coast-artillery in conditions in determining wind conditions. It isn't advertising that is costly. It is oblivion.

It isn't advertising that is costly. It is oblivion.

A Mechanical Brain

New Calculating Machine Thinks Quickly In Queer Way

Invention of a mechanical brain whose grey matter is mostly logic, has been announced by the Massachusetts Institute of technology.

The brain is a calculating machine, which makes use of light by a trick almost as simple as the cutting out of paper dolls. It performs in a few minutes mathematical problems which by human brains and hands require anything from hours to days.

It analyzes graphs by turning them into light. Graphs are lines showing averages. They are the lines which rise and fall, like a tracing of mountain peaks, to picture anything from a series of business cycles to the variations of good radio reception.

The paper on which these graphs are traced is treated so that the portion below the graph is transparent. The effect is like cutting out paper dolls outlined as openings in the original card.

An Ancient Food

Honey Used As Food Since the Dawn of History

Honey is one of the oldest foods of man. There is little doubt that our early ancestors discovered the honey of the wild bee long before they learned to make bread.

The honey's antiquity was likely as good as that of today except that different flowers at that time gave it a different taste, in reducing the honey to food.

Honey is unique in that it is the only unmanufactured sweet available in unlimited quantities. It contains simple sugars, easily absorbed by the human system. Honey contains in limited quantities practically all the elements of a perfect food except the vitamins.

Honey is no longer other than that made by bees, and therefore it is a safe food to use because it is clean and pure.

Longest Day Not Fixed Date

Director Of Dominion Observatory Gives Reason For Change

June 21, was not the longest day in the year in Canada this year, as is the common impression. The longest day was June 22, this year.

Dr. R. Meldrum Stewart, director of the Dominion Observatory, said that the method of reckoning is the time at which the sun is farthest north. Some years it is only a matter of seconds difference as to which day is actually the longest according to this reckoning.

"Oh, Mr. Policeman—a man has been following me."

"Are you sure he was following you?"

"Yes, I went back two or three times to see if he was coming."

The naturalist limits the use of the word "bug" to insects whose mouth parts are like a tube through which food is sucked, differing from insects that bite and chew.

Hellum, first discovered as a gas in the spectrum of the sun, gets its name from the Greek word hellon meaning sun.

In a black bass family the male prepares the nest and later stands guard over the eggs.

Vegetables Are Being Improved By Science

And Consuming Public Is Slow To Recognize Fact

Slow as science progresses in the improvement of food commodities, it is still several jumps ahead of the consuming public, according to vegetable specialists at Michigan State College.

Most consumers still order "string beans" when they purchase fresh vegetables, but in reality, the specialists assert, there no longer is much a string bean as string beans planted at Michigan State College and at various agricultural experiment stations have bred the "string" out of was beans.

In breeding out the strings, the scientists have further improved the vegetable by breeding more "snap" into the pods. Vegetable specialists declare the proper name for string beans now is snap beans. They are much more readily picked when made ready snap in breaking, making it unnecessary to use a knife in preparing for the table.

Scientists also have improved other vegetables. Prof. Geo. Starr, while a member of Michigan State College, developed red beets which will not fade in cooking or processing. When he undertook this project many varieties of beets turned pink and even white in cooking.

Considerable work also was done in the improvement of earlier varieties of sweet corn, in breeding a higher sugar content in sweet corn, in developing varieties of sweet corn and content of tomatoes in advancing maturity of tomatoes, and increasing yields per acre, in breeding "yellow" resistant varieties of celery and cabbage and in improving standard varieties of onion.

The average consumer today little appreciates the improvements made in most vegetables and green stuffs by scientists in the last decade or more, according to vegetable specialists. The improvements have been made so slowly that few persons outside the experiment stations and agricultural colleges have been aware of changes in quality or growth characteristics.

The public's attention usually is not called to developments in the truck gardening industry until some new pest or disease menaces the supply and retail prices are influenced thereby. Many new discoveries by scientists have gone unnoticed, the specialists assert, because they have not materially affected the consumer's pocketbook adversely.

The average consumer is more concerned over whether insects destroy crops or the drought curtails production than in any improvements which scientists may effect in varieties, in the opinion of horticulturists.

The Real Cost Factor

Home Grown Feeds Help Greatly To Reduce Production Expenses Of Live Stock

In order to reduce production costs of live stock and live stock products high yields of home-grown feeds are the prime requisite, animal husbandry experts of the Dominion Department of Agriculture assert. One must measure the milk production of the herd not as so many pounds per head, but per acre of land that grew the crops that in turn fed the herd. Only then will they exist in proper relationship. This means thorough cultivation and efficient farm practice —better than ever before.

Importance Of New Route

Shipments Via Hudson Bay Will Greatly Benefit Western Business

Information is made that first shipments of wheat over the new Hudson Bay route will be made this fall. It is not proposed to begin shipments of other commodities until after first wheat shipments have been made.

The establishment of a route via Hudson Bay for the transport of Canadian wheat, cattle, and dairy products to the markets of Europe has been a possibility long anticipated by farmers and business interests of Western Canada. The objective which they sought might be summed up in the following illustrations:

From Vancouver to Saint John, the eastern seaport of New Brunswick, is 3,566 miles, with an ocean voyage to Liverpool of 2,710 miles—a total of 6,276 miles. The Hudson Bay route would save a journey of 5,240 miles from Vancouver to Liverpool. From Edmonton to Churchill is only 1,538 miles, but via the Hudson Bay route to Liverpool being 2,556 miles.

The products of Western Canada now reach the European market either by way of the Great Lakes or by the Pacific ports and the Panama Canal. By the latter route the distance from Vancouver to Liverpool is 10,256 miles, but by the Hudson Bay route it is merely 4,574 miles.

—The establishment of a new route from the point of view not only of the saving of time and the cutting of expenses, also from that of trade expansion, is expected to have outstanding effects upon the development of Western Canada.

Ideal Automobile Insurance

Would Have Higher Premium For Careless and Reckless Drivers

No automobile insurance bill will be satisfactory unless it provides penalties in the way of higher rates for careless and reckless drivers. The records of the state of Massachusetts and others show that a very large proportion of fatal accidents are caused by experienced drivers—men who seem to be getting into trouble continually. An investigation in Illinois of records of drivers involved in fatal accidents shows that every one of them had a previous accident record. Some had been involved in three or more previous accidents. There is a type of driver who just won't be careful. The way to curb these fellows is to make recklessness costly. They ought to be made to pay heavily for insurance.

Mixed Farming In Manitoba

Syndicate Has Purchased Land For United States Settlers

Mixed farming on a large scale will follow the arrival in Manitoba during the summer of a number of farmers from Minnesota, North Dakota and Wisconsin under a colonization scheme, sponsored by a Minneapolis syndicate. The syndicate, through a Winnipeg agent, has purchased 30,000 acres of farm lands in the Lakeland district, north of Portage in Prairie, about five miles northwest of Winnipeg, and has negotiated with the government for 10,000 acres in the province though its location has not been disclosed. The syndicate of the United States settlers is expected to arrive in the Lakeland district soon.

Looking For Business

A notice in the Virginia Churchman reads:—

"We have decided to reduce our subscription to \$2.00 per annum. \$3.00 to \$2.00 a word. We hope that this reduction will be the means of making this column used more by our church people."

Bridge Arch Forms Farm

Arizona's oldest farm is a five-acre piece forming the top of the arch of Goodfellow's natural bridge in the colorful district north of Roosevelt dam. The soil of the farm is good. The bridge is 180 feet high and has a wall to wall spread of 250 feet.

You can tell a polite man. He sits at a table and sips water while the vulgar table-pounder gets service.

"Who crushed your silk hat like this?"

"Pardon me, that is my wife's new hat." —Nagels Lustig Welt, Berlin.

The above map shows the transcontinental line of the Canadian National Railway from Quebec City to Winnipeg along which it is proposed to lay the Trans-Canada highway. Completed portions built as provincial highways run from Cochrane to Hearst in Ontario and from Hearst to La Ronge in Quebec. The irregular line ending in Ungava depicts the height of land around Hudson Bay, along which many mining developments have been uncovered. It is claimed that the distance between Montreal or Ottawa and Winnipeg will be shorter by 200 miles, following this Northern straight route, when a Quebec feeder road from Maniwaki to Semetierre is completed. Its advocates urge that besides providing an all-year road for local and inter-provincial use, promoting agricultural settlement and development of unbelievable natural resources, it would make accessible to Canadian and United States' tourists an enormous hinterland of unparalleled hunting and angling opportunities.

IF THE HIKING CRAZE SPREADS
Service Stations for hikers.
—The Panning Show, London.

WORLD HAPPENINGS BRIEFLY TOLD

Displays of 269 firms were shown in the advertising and packing section of this year's fair at Leipzig, Germany.

The London Daily Herald says that Amy Johnson, British aviatrix who made a solo flight to Australia, is now preparing for a trip across Europe and Asia to Tokyo.

Feminist leaders of the world, after a two-day's meeting, agreed on a report to assembly of the League of Nations demanding complete equality for men and women in the matter of nationality.

Mrs. C. M. Strong, affectionately known to thousands of Canadian troops overseas during the Great War, as "mother" of the 44th Battalion, died at her home in Winnipeg recently.

His first visit to civilization was too much for Otto Knudsen, Eskimo hunter of the Laue Koch Arctic Expedition, who became violently despondent when he saw his first movie at Thorshavn, Faeroe Island.

Among scientists who have been awarded long-term grants for medical research, by the trustees of the Banting Research Foundation, is Samuel Weinstein, University of Saskatchewan.

From his colleagues in the cabinet, Rt. Hon. R. B. Bennett, prime minister, was the recipient of a beautiful set of antique silver entrée dishes. The gift was in recognition of his 61st birthday.

In front of the Australian commonwealth building at Canberra will be shortly erected a 200 foot flag pole of Douglas fir, the gift of the province of British Columbia to the Australian people.

Excellent progress is being made in driving the herd of Alaskan reindeer to its new quarters in the Mackenzie River district, Hon. T. G. Murphy, Minister of the Interior, told the House of Commons recently. Latest reports said the herd was about 300 miles from its destination.

Fruit Land Taken Up

Over 50 acres of orchard and vegetable land were taken up by new settlers in the Southern Okanagan of British Columbia during the past year. Prices ranged from \$50 an acre for raw land to \$750 for improved and bearing orchard. Approximately 25,000 young fruit trees were planted.

War Hero Dies in Theatre

General Bertrand, national hero for his spirited defence of Liege and for the year campaign during the Great War, dropped dead in a theatre at Brussels. He was credited with delaying the Germans for ten days at Liege whilst Marcinia was being evacuated by the French army for the defence of Paris.

The youth who claimed that the four kinds of sheep were: white sheep, black sheep, Mary's little lamb, and hydraulic ram, was certainly not a true son of the soil.

"In conclusion, I would plead as an extraordinary circumstance, the absolute innocence of the accused!"—Madame Justice, Stockholm.

W. N. U. 1928

Cunard Week-End Cruises

Something New in the Line of Ocean Travel

A pioneer steamship company for the past 81 years, the Cunard Line came to the front this year with something new in the line of ocean travel; the week-end cruise, a voyage which gives practically everyone who can afford even a short vacation a chance to go to sea and visit a foreign port.

Already thousands have visited Nassau, down near the Tropic of Cancer, more than 900 miles south of New York, and the Islands of the mudra, 600 miles off the coast of Savannah, and they made the round trip in four days. The better part of a day was spent ashore in sight-seeing, golfing or sea bathing.

The schedule for the summer season calls for week-end cruises to Nova Scotia, with sufficient time to visit many historic points in the environs of Halifax, the birthplace of Samuel Cunard, founder of the line which bears his name.

The Cunard's week-end cruises are made by the line's express steamers, the "Berengaria," "Aquitania," and "Mauretania," among the largest and finest ships in the world.

These liners steam through the sea at a leisurely pace of 16 to 20 knots, so that the voyager may get the full enjoyment of the breezing air and the health-giving sunshine.

To the question, "What is done on these week-end cruises?" the answer might properly be: Everything! People play the regular deck games and invent new ones of their own; they bet on the day's run of the ship, as well as upon the horseshoe on deck; they bathe in the indoor pool or in the huge tank on deck; they dry themselves by lying prone on the hatch tops or take sun baths in deck chairs; they loaf about in bathing costumes; they play cards; they read; they listen to many types of wide-legged pajamas; in short, they do very much as they please, and they offend no one by doing so. Also there are lectures, photo plays, dances and night clubs.

Good food plays a large part in the pleasure of the day, and the catering superintendent of the line goes along to make sure that there is no economy practiced on the bill of fare; that dishes are added rather than cut out.

The entire ship is first class for these week-end cruises. There is no smoking or drinking on board, and no smoking or drinking anywhere. Passengers are permitted to use all the public rooms and every deck from stem to stern.

These trips make a good way for vacationists who go away for two to three weeks every summer. They give such people a chance to begin or close the vacation period with a sea trip and yet take no more time for a week or two in the mountains as usual.

An interesting sight is the ceremony of dropping the pilot after passing through Ambrose Channel. This is an incident which lines the rail with cheers. The pilot, a small boat, leaves in a small rowboat, being picked up a hundred or two hundred yards away by the yacht-like launch. Soon after passing here all land fades out of sight. The next delight of this kind is catching the first sight of the land to which the ship is steaming. This always reminds the passengers of the thrill which came to Columbus when the first land loomed up in the West Indies.

Returning from a cruise a great crowd moves to the rail to note the arrival of the Sandy Hook pilot in his little rowboat, looking like a chip alongside the huge liner. At quarantine, off the eastern shore of Staten Island in New York Bay, the port doctor comes aboard and when he clears the ship the customs and immigration men board the steamer on a coast guard cutter and check up on every passenger on the ship, leaving no loophole for the stowaway.

This ceremony over, the ship proceeds to her pier, where many people await the arrival of the tourists. Once on the pier, the baggage is quickly passed and the passengers go home to tell their friends about this new idea in ocean voyaging and to urge them to book to take on for a week-end tour on the wide Atlantic.

Fruit Market in China

Fruit shippers of the Okanagan have much interest in the situation of Col. L. M. McGraw, Canadian Government Trade Commissioner at Shanghai, that China offers a large outlet for low grade fruit at an economical price. The subject was brought up at two meetings in Vancouver addressed by Colonel McGraw.

Edmonton a City of Homes
Eighteen hundred new homes were erected in Edmonton during the last six years, or an average of 300 new houses a year. It is pointed out in a special issue of the Edmonton Journal. The original cost of these homes, not including repairs and additions, figures at about \$5,000,000.

Buried Treasure

Party of Vancouver Men Will Sail To Cocos Island in Search of Hidden Wealth

Lured by legendary tales of fabulous treasure buried by pirates of olden days, a party of Vancouver men, headed by Col. J. E. Leckie, will sail for Cocos Island, 500 miles off the coast of Costa Rica.

It is popularly supposed that more than 300 tons of treasure, valued at \$600,000,000, is hidden on Cocos Island, buried there by Thompson, Davis and other famous pirates of early days. Wealthy citizens of Peru are also said to have hidden their gold and jewels there in the revolution of 1883.

Three other British Columbia expeditions have searched for treasure on Cocos Island, one in 1892, on the Eliza Edwards, under command of Capt. F. S. Mackenzie, of Vancouver; another in 1905, from Victoria, and a third in 1924.

Sir Malcolm Campbell, world's auto speed record holder, announced recently that he will make another visit to Cocos Island this summer. He is reported to be outfitting an expedition in Esquimalt, now.

Col. Leckie's party will sail direct to Costa Rica, where eight Costa Rican soldiers and an officer to guard the interests of the state will join the expedition. Cocos Island is owned by Costa Rica and the state has the one-third of whatever treasure is found.

Keeps Editors in Order

Unique Gavel Used By President At C.W.N.A. Convention

One of the most important items in evidence at the Canadian Weekly Newspapers' Association Convention at Regina, Saskatchewan, is the gavel used by President Malcolm Macbeth to keep the editors in order. It is made from the wood of old Fort Malden, vintage about 1800 A.D., and is a remnant of General Isaac Brock and Tecumseh, the famous Indian chief.

This gavel was presented to the association in 1930 by the Lake Erie Club. St. Clair Pugh's Association. At that time Hugh Savage, of Dunham, B.C., was president of the association, so the gavel was handed to him with the words, "From one savage to another."

The gavel is suitably decorated with silver plate setting forth its antiquity and usage.

Goods Had Vanished

Ice Melted While Customs Officials Debated on Classification

It is only within the last century, says the Manchester Guardian, that we have learned to temper summer heat—when we get it—with lead drinks. The first cargo of summer ice brought to this country was shipped from Norway, and it arrived in the Thames in June, 1822. The customs officials had to deliberate long and earnestly as to the heading under which it should be classified for duty. When at length they decided to list it as "dry goods" the entire cargo of 300 tons was found to have melted.

Sponsor Withdraws Bill

Proposed Amendment Dealing With N.S.F. Cheques Is Dropped

On the suggestion of Hon. Hugh Guthrie, minister of justice, the bill of A. W. Neill (Ind. Con.-Alb.), dealing with cheques issued without funds was dropped by its sponsor in the House of Commons. In brief the proposed amendment provided that if cheques issued with no funds or if cheques issued in the bank were not to be liable unless he failed within a reasonable time to be given the first offence to a fine not exceeding \$100 or three months' imprisonment, and to \$200 fine or six months' imprisonment for a subsequent offence.

Certain amendments would be introduced this session to the criminal code, Mr. Guthrie stated, and consideration would be given to the bill that Mr. Neill really had in mind.

"The view I take," the minister of justice stated in speaking of the measure presented, "is that the proposed amendment would open the door to issuers of worthless cheques. Under the bill the issuer would not be liable unless he failed within a reasonable time to pay the amount."

New Senators Appointed

Patrick Burns, of Calgary, Alberta, Named a Member of Upper Chamber

Patrick Burns, of Calgary, Alberta, well-known cattle man, has been appointed to the senate. Arthur MacCortie, K.C., Pontiac, Sask., has also been named a member of the Upper Chamber. Official announcement to this effect was made recently.

The new appointee from Alberta will succeed the late Senator P. E. Lessard, Edmonton, who died in April last. Saskatchewan's new senator will fill the vacancy caused by the death of Hon. J. G. Turfitt last fall. The party standing in the senate will now be: Conservatives, 47; Liberals, 48.

One more vacancy exists in the Upper Chamber at present due to the death, slightly more than two months ago, of Senator G. G. Foster, Montreal. When this vacancy is filled, Conservatives and Liberals will have equal representation.

Introduced Amendment To Companies' Act

Bill Aims To Aid Employees In Purchasing Homes

Amending the Companies Act so as to enable a company to make loans to its employees for the purpose of purchasing or building their own homes, even when such employees are shareholders of the company, Hon. C. H. Caban, secretary of state, introduced a bill into the House of Commons. The bill received first reading.

The amending bill also permits the auditor of a company to be a director, when such company's bonds and shares are not offered for public subscription.

Rolla—Jam is what causes bread to taste not so nice when there's none on it.

Another Notable Flight

Captain Hawks Makes Remarkable Time in Eastern Canada Hop

Quebec, Montreal, Toronto and Ottawa have been drawn closer together by a series of sensational flying performances of Captain Frank Hawks, famous United States speed pilot.

Montreal is no more than 32 minutes from Ottawa; 48 minutes from Quebec, and 108 minutes from Toronto, while the capital and Toronto are only 10 minutes apart. These were the times taken by Hawks and his monoplane in a flight from Quebec to Montreal, then on to Toronto, and back to Montreal via Ottawa. Several of these times were hailed as new records.

Hawks flew from Quebec to Montreal where he enjoyed breakfast. Ottawa as guest of Hon. Harold took luncheon in Toronto, tea in and was back in Montreal to be McNair, United States minister, guest of the Montreal Little Aero-plane Club at dinner.

Sixty-eight hours Hawks was in the air four hours, 15 minutes and during that time covered an air distance of approximately 850 miles, averaging 100 miles an hour. The achievement rivals in some measure the notable recent flight of Captain MacNair, United States minister, to Berlin and back to Paris in a single day; also the flight that took him from London to Rome and back in a single day.

Research Grants

Westerners Receive Aid Under Banting Research Foundation

Among the scientists who have been awarded long-term grants for medical research by the trustees of the Banting Research Foundation, is Samuel Weinstein, University of Saskatchewan.

Prof. F. D. White, P. G. Mar, and Dr. R. H. Fraser, all of University of Manitoba, were awarded short-term grants.

Professor White is the assistant professor of bio-chemistry at the Medical College, Peter Mar has completed his master's degree in medicine and Dr. Fraser is the lecturer in physiology and pharmacology. The research work which is being done by them covers the present summer only, and was begun shortly after the closing of the winter term in the medical college. Peter Mar is a graduate in science of the university, and has this qualification for research work.

Onion Diet For Sheep

Sheep flocks on Colorado's western range have been put on an onion diet to reduce last year's surplus. F. D. Warren, warehouse owner, said hundreds of sheep owners have been given sheep owners, as there has been no market for them.

Standing on a concrete floor while using an electric iron is dangerous, for a shock may be transmitted if the concrete is damp.

Make Your Windows Pay

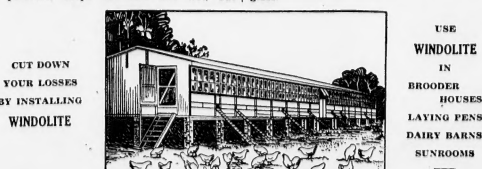

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

A SMART SLIP THAT ACCENTuates SLIMNESS

It's the new wrap-around slip that follows the shaping of the figure. It's made from a length of material.

No seams to cause conflicting lines to the outer garment.

The wrapped arrangement makes shadow proof.

The selvedge edge of the material makes a smart neat finish for the lower edge of the slip.

The side edges of the slip may be finished with a picot edge or rolled in hem. This is about all the sewing required to make it, save for a few darts through the bodice, and to tack the shoulder straps in place.

It's straight from Paris!

You'll be thrilled with the easy manner in which it is made.

It will make an excellent Xmas gift.

The back, too, has perforations for deep V for evening wear. The upper and lower edge may be trimmed with lace.

Crepe de chine, crepe satin and tulle gowns are popularly used.

Style No. 960 may be had in sizes 12, 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Size 16 requires 14, yards 39-inch.

Pattern price 25 cents in stamps or coin (as preferred). Wrap coin carefully.

GRANT FLEMING, M.D., - ASSOCIATE SECRETARY

Within and Without

Used freely both within and without, water helps to keep the body fit. Water can safely be used in abundance. The body is largely composed of water. Many of the foods we use comprise a surprisingly large percentage of water. This is one way in which we secure the water we require, but we should in addition, drink water regularly.

It is impossible to say how much water we should drink each day. On hot days, we perspire much more freely than at other times. Physical exertion at work or at play also causes us to perspire. Because of these differences, we require more water during the hot season, and more if we are physically active than when we are resting quietly.

We are convinced however, that many persons would be better if they used more water. We suggest that a glass or two of water before breakfast or between meals is a drink habit that should be cultivated. It will keep up the supply of fluids the body requires, and will help to promote regular elimination.

There is no objection to the use of beverages with meals, providing the fluid is not used to wash down food. A drink should never be taken while there is food in the mouth. Another thing to avoid is the taking of a cold drink just before meals. At that time, the blood vessels of the stomach are dilated and the digestive glands are active. A flood of cold water at this time upsets this necessary arrangement for the digestion of the meal which is about to be eaten.

Drink cool, not cold water and drink it slowly during the meal. Eat slowly, drink slowly. Remember that moderation is the key to health.

The body should be kept clean by regular bathing. More baths are required in summer

than in winter because we perspire more in the warm weather. A clean skin helps to keep the body healthy, makes for personal comfort and prevents disagreeable body odours.

Wash the hands thoroughly before each meal, this simple habit will do much to protect you from disease.

We are not suggesting anything difficult here. Where there is water available, there is no reason why it should not be used freely.

Try to develop the habit of drinking water between meals, and see if it does not help you to keep healthy.

RIDING IN THE CLOUDS

The pictures show a typical trail ride, camp scene, feeding a horse and horse-wrangler's pack train always ahead to welcome riders at the evening meal, with the night's camp all ready for occupation. Horses that are as sure-footed as goats all contribute to making this form of holiday one of the most original and enjoyable on the American continent. Canadian Pacific Lines carry enthusiastic and new recruits from the four corners of the earth to Banff and Lake Louise, each summer. This year the official four-day ride will be held from July 30 to August 2, covering 52 miles through Banff National Park, in territory with special appeal to the photographer and fisherman, and will be followed by a 10-day ride of greater mileage.

Up, out and away from the cares and limitations of modern life, sharing the joys of long days in the saddle in flower-strewn Alpine and estate passes with a goodly company of kindred spirits; happy excursions from the campfires and restful, peace-giving nights in the snug little tent of the mountain. Such is the life of the Trail Riders of the Canadian Rockies, on their annual expeditions from Banff and Lake Louise, which have long since become famous. It is the summer program of the two great Canadian Pacific Rail-

way hotels at these renowned holiday places. Carefully planned rides, of varying durations to suit all tastes, experienced guides, cooks and horse-wrangers; a pack train always ahead to welcome riders at the evening meal, with the night's camp all ready for occupation. Horses that are as sure-footed as goats all contribute to making this form of holiday one of the most original and enjoyable on the American continent. Canadian Pacific Lines carry enthusiastic and new recruits from the four corners of the earth to Banff and Lake Louise, each summer.
